

Analysis Report: "Water Resources Management in the Russian Federation"

The Network of EECCA Water Management Organizations
The report is a synthesis of information gathered from various sources, including government documents, academic research, and interviews with experts in the field. It provides a comprehensive overview of the current state of water resources management in the Russian Federation, highlighting key challenges and opportunities for improvement. The report is intended to serve as a reference for policymakers, researchers, and practitioners involved in water resource management in the region.
